

Tech Floor raised floor with Watson Synergy Consoles in Parsippany PD's new Dispatch Center

”We love the look and feel of our Bergvik Raised Floor”

Lieutenant Al Lawrence
Parsippany-Troy Hills,
NJ Police Department.

“We decided on Tech Floor from Bergvik for our new dispatch center because of their attractive pricing and customer support including expeditious service and a commitment to a quick installation,” states Lt. Al Lawrence.

“Bergvik designed and adapted their floor for us, made the ordering process easy and the floor was installed in two days. All wires were installed under the panels and were brought up directly to all four dispatch consoles.

Bergvik’s panels being designed with a solid wood core construction, provides a quiet, sound absorbent floor which eliminates echo sounds. The panels tapered edges make them easy to put back into place and they fit tightly. Also, the thin edge trim gives the floor an aesthetically pleasing look.

As shown, the floor color is light and attractive, blending well with the furniture. and the granite laminate is extremely low maintenance.

We love the working environment in our new dispatch center, including the look and feel of our Bergvik raised floor.”
