To whom it may concern,

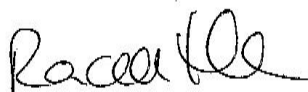

Since its Caribbean GSM Network launch year 2001 in Jamaica, Digicel has used the Bergvik Flooring Iso Floor raised floor and seismic zone 4 bracing system in three buildings.

We have also used the Bergvik floor and bracing in Haiti for two buildings, in Trinidad for two buildings, and in El Salvador for one building in the last year with great success. Our GSM System vendor has been Ericsson, the world leader in Telecom Networks.

On September 26, 2006 we had a major earthquake measuring 5.1 magnitude in Trinidad, but thanks to Bergvik and their secure floor bracing solutions we did not have any damage to our network which stayed fully operational.

We can highly recommend Bergvik as a vendor of raised floor and seismic bracing solutions.

Yours sincerely,

Digicel Trinidad & Tobago
