## **BERGVIK MOUNTING CLAMP**

## FOR STANDARD CABLE LADDER BRACKETS

Bergvik's mounting clamp for cable ladders is an accessory customized for Iso Floor and HiFlex Floor pedestals, for floor height of minimum 400 mm. They are suited for the most common brackets in the market. You can also attach other equipment, such as "Canalis" rails directly to the mounting clamps.

The mounting clamps are very easy to install and have support studs (2 pieces M10 self clinching screw) for assembly of cable ladder brackets on both sides. If support studs are needed on more sides, two units can be connected, which gives additional options.

The mounting clamp is easily mounted to the pedestals with 2 pieces of M8 nuts that come with the product kits. The holder clamps are delivered electro-plated and come complete for mounting of 2 pieces of cable ladder brackets per pedestal.

DESCRIPTION		
80/40 mounting clamp suited for Iso Floor pedestal		
60/60 mounting clamp suited for HiFlex Floor pedestal		
WIDTH	DEPTH	
80 mm	40 mm
